From the founder's desk

As the founder and managing trustee of the Humane Animal Society (HAS), I take immense pride in presenting our annual report. This report is a testament to the tireless efforts we've made in 2022-2023 toward building a safer and more compassionate environment for Coimbatore's stray animals, fostering awareness, and witnessing the realisation of our cherished dream: the Humane Animal Hospital.

The achievements we have made this year are no small feat. In the year 2022-2023, HAS extended its helping hand to nearly 14,000 animals, including dogs, cats, large animals and birds, through our diverse programmes. This remarkable impact was made possible by the utmost dedication of our team, comprising passionate medical team, legal support, administrative and program staff, as well as our diligent animal handlers and caretakers.

From our modest beginnings in 2006, when we initiated animal birth control and anti-rabies vaccination (ABC/ARV) services, HAS has grown to encompass the rescue, treatment, and adoption of abandoned and injured animals

all over Coimbatore, and, sometimes, beyond.

In April 2022, we celebrated a significant milestone with the inauguration of the Humane Animal Hospital (HAH) at Selvapuram, Coimbatore. The hospital has helped us fulfil the city's need for affordable, accessible, and high-quality care for strays and pets alike. In the upcoming financial year, our goal is to extend emergency hours to ensure timely treatment for animals in distress. We also aim to equip the hospital with the necessary infrastructure to provide an even better standard of care.

In 2022-2023, we also upgraded our infrastructure including the acquisition of an X-ray machine at our ABC and Rescue Centre, thanks to the generous donations by both individual and corporate donors. We are grateful for their continued support towards our efforts in aiding animals in need. Throughout the year, we conducted numerous sensitisation and awareness programs at our centre, and collaborated with educational institutions for special outreach programs. Witnessing the commitment and enthusiasm

Dr. Mini Vasudevan

of participants fills us with hope for a future where our community is marked by empathy, compassion, and a deep commitment to the well-being of our city's animals.

As I conclude this note, I do so with a heart full of gratitude for the strides we have taken and the countless animal lives we have touched. Our journey continues, and with your support, we look forward to making even greater progress in the coming years. Our mission remains unwavering, our commitment to animals unyielding, and our dedication to

building a more humane society resolute. Thank you for being an indispensable part of this remarkable journey where every animal knows kindness, care, and a brighter future.

Mini Vasudevan

Mission

- To mitigate animal suffering through humane control of population, rescue, treating, and rehabilitation;
- To spread awareness for animal rights through education;
- To empower humans by providing them a platform to contribute to the cause in their own unique way.

Vision

A compassionate society where exploitation and abuse of animals is a thing of the past, and all animals can claim their rightful place on this planet.

Team values: the five freedoms of animal welfare

- Freedom from hunger and thirst;
- Freedom from discomfort;
- Freedom from pain, injury, and disease;
- Freedom to express normal behaviour;
- Freedom from fear and distress.

The year in review

As the city of Coimbatore expands rapidly, so does the population of its stray animals and their need for care. That has kept our team at HAS on their toes through the year.

Our regular programs such as rescues, special surgeries, animal birth control, and vaccinations have all grown over the financial year 2022–2023. Our

outpatient services increased significantly this year handling 4442 animals against 2884 animals in the financial year of 2021–2022.

We continued our engagement with corporate partners through employee sensitisation programs at our centre. Employees got the opportunity to spend quality time with our animals

and learn the basics of animal care. In addition, corporate funds were utilised for infra-structural needs, material needs, vaccinations, and animal birth control drives.

The inauguration of the Humane Animal Hospital at Selvapuram, Coimbatore in April 2022 is a great value-addition with affordable quality care for strays and pets in Coimbatore.

We conducted several awareness programs for students, both at our centre and at their institutions. Students participated

enthusiastically to learn about the issues affecting stray animals, and about basic animal care.

We continued to be supported by enthusiastic volunteers who offered their time and energy to assist with all tasks at our centre. Many of our dogs and cats also found loving adoptive families, including some of our friends who had lost a limb or some other bodily function but not their spirits.

The following data shows you specific numbers for our primary activities.

Table 1. 2022-2023 in numbers

Month	Special surgeries	Rescues	ABCs	Vaccinations	Out-patients	Adoptions
March 2023	9	33	227	643	562	11
February 2023	16	29	229	342	332	18
January 2023	13	52	219	591	390	11
December 2022	20	43	229	529	402	12
November 2022	16	43	212	480	390	16
October 2022	15	38	194	617	363	23
September 2022	12	39	159	704	446	16
August 2022	6	33	200	398	361	13
July 2022	15	49	226	606	302	16

April 2022	9	27	178	467	211	31
Total	146	464	2509	6210	4442	211

Transformations

Humane Animal Society's (HAS) program for the rescue of abandoned, distressed, and injured animals, holds, perhaps, the most significant place in our efforts to build a safer world for those who don't have a voice.

Needless to say, our beloved four-legged friends are resilient beyond expression, and have gone

through transformations that can only be a source of inspiration.

In the financial year 2022-2023, HAS rescued 464 animals, including adult dogs and cats as well as pups, kittens, and a bird. Most of the cases were brought in advanced stages of distress, and were treated and cared for by HAS's in-house veterinary staff and volunteers.

Several cases HAS dealt with also suffered from transmissible venereal tumor (TVT) or malignant (cancerous) tumors that can easily spread between dogs. As well, there were cases of road accidents, and human-inflicted injuries.

HAS's commitment continues to be that of offering a safe and loving sanctuary for those who don't have a home to return to, and providing the best medical treatment for the best possible recovery. Nonetheless, it is heartbreaking that some cases are so extreme that they end in euthanasia.

Transformation tales

Max was found abandoned in a dump yard with maggot-infested wounds on his head. His journey

Zudo, during and after recovery

to transformation took 3 weeks. While in recovery, HAS's doctors and care workers administered much-needed medical treatments and medicines. Soon after his recovery, Max found a loving home with Ram Priya and her family who were looking to fill the void left by their late German shepherd.

Zudo injured his limbs critically in a road traffic accident and found himself stuck in a soak pit. He was in great agony when rushed to our clinic. He was unable to stand on his own. One month of regular phys-

iotherapy and hydrotherapy led to his recovery, and he began to walk again. His current home is HAS's rescue centre, and we're hoping a caring human will soon adopt him.

Danny fell victim to human cruelty with a rubber band looped around his neck causing grievous injury and pain. Danny received daily treatment for his wounds that finally healed with suturing. Danny recovered well enough within 3.5 months for us to return him to his natural habitat, watched over by a loving citizen who continues to be Danny's guardian.

Max, fully recovered with his adoptive family

Danny, before and after recovery

Special surgeries

Many of the rescued animals require special surgeries to survive and thrive. The HAS medical team, led by Dr. S. Abhilash, successfully carried out 146 surgeries to restore dogs and cats to normal health, and to ameliorate pain and suffering. Some of the surgeries necessitate amputating an injured limb, but our spirited animals learn to lead normal lives in spite of that.

It's heart-warming to share that even those furries who underwent amputations have found loving and caring families.

With the opening of Humane

Animal Hospital at Selvapuram, Coimbatore in April 2022, and the upgradation of medical infrastructure, such as the addition of an X-ray machine in January 2023, our medical interventions are now timely and effective. Besides, the love and care bestowed by our team ensures healthy recoveries for our furry friends.

We present here a few instances of surgical interventions that led to the survival and recovery of some extremely severe cases.

Special surgery tales

Community dog, Baxter, was found sprawled beside the road with a broken jaw; a victim of yet another road accident. He was in terrible pain and shock when rushed to our centre. He needed mandibular reconstructive surgery and loving care under the watchful eyes of our patient welfare team to bounce back and be able to crunch his favourite foods. The surgery followed by recovery lasted six weeks before HAS released him to the community neighbourhood.

Sanah was brought to us with a massive mammary tumour weighing 1.75 kilograms, making it

difficult for her to even walk. The tumour was surgically removed, relieving her intense discomfort. Her post-operative recovery took 20 days, before she was returned to her natural habitat.

Gianni reached us with an entire limb without skin or flesh. Due to

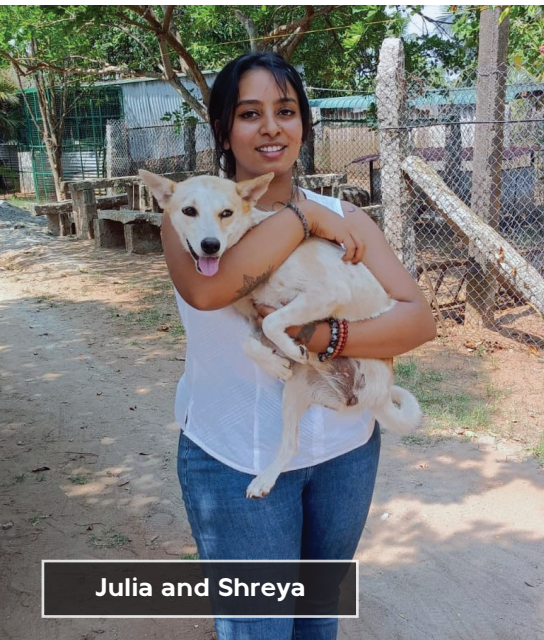

the severity of the injury, he was understandably aggressive and in need of sensitised care. Our team handled him with great love in preparation for the amputation surgery. The resilient feline not only survived, but adapted to his new life with three legs. He was up and about in just 2 weeks.

Adoptions

When rescue, transformation, and special surgeries culminate in adoption, it gives the HAS team the utmost satisfaction. We, at HAS, strongly believed in *Adopt, Don't Shop*. We encourage animal lovers to adopt the Great Indian Breed. They are loyal, loving companions that have higher immunity in local conditions.

We are delighted that 211 dogs and cats, and one bird, found safe, loving families in the financial year

Julia and Shreya

2022—2023. The photographs here amply demonstrate the happiness of both the animals and their adoptive families.

Below are a few heart-warming adoption stories, among the many, that we would love to share for the year.

Adoption tales

Julia severely injured one of her legs in a road traffic accident. Her leg had to be amputated after she was rescued. A volunteer, Shreya, was looking to adopt a dog who would get along with her three dogs. Julia won her over after they spent some quality time together at our centre. Shreya took her home the very next day. We were thrilled for Julia to have found such a loving home.

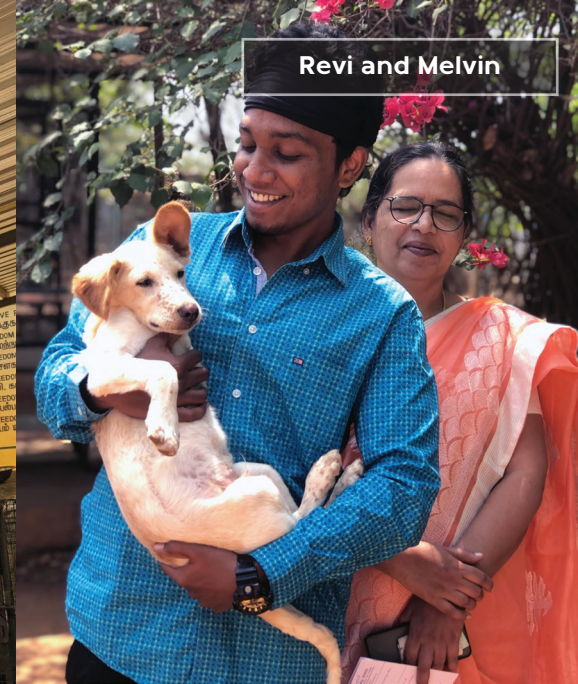

Little kitty Vasco was orphaned early with her brother Kite. They were rescued from their struggle on the streets. Rishin was completely bowled over by her cute photograph, and came all the way from Gudalur to adopt her. The young kitty headed off with Rishin to a new life in the Nilgiris.

The playful, loving, and energetic Revi lost her left forelimb in a

Vasco and Rishin

gruesome accident as a 6-week-old pup. Her leg had to be amputated. This did not stop Revi from having all the fun. Melvin, visiting the ABC and Rescue Centre

Revi and Melvin

looking for a pet, was won over by Revi's charms, and decided to adopt him almost immediately. The pair have become best friends for life.

Bosco

Animal birth control and vaccinations

Animal birth control (ABC) and vaccinations are both key components of the HAS program.

ABC is the most effective way of controlling the population of stray or homeless animals. Spaying or neutering also has tremendous health benefits for both female and male animals. Besides, it prevents behavioural issues such as aggression and territorial marking.

HAS carried out 2509 procedures of spaying/neutering for dogs and cats in the financial year of 2022–2023.

HAS collaborated with the local administration for drives in specific areas of the city. While

some of it happened at our centre or governmental facilities, we reached out to the community by conducting drives in rabies hot spots around the city.

This year was marked by two events in particular. HAS organised a free spay/neuter camp for pet owners on the occasion of World Spay Day in February 2023. This camp led to eight dogs and cats undergoing the procedure. We envisage more such events in the coming years with larger awareness campaigns in order to reach out to the local communities and neighbourhoods.

HAS also collaborated with the

Anti-rabies vaccination drive at Saibaba Colony

Coimbatore administration to conduct a sterilisation program at the Ukkadam Sterilization Center in December 2022. Fifty-five street dogs were sterilised and released in their respective territories. These programs will eventually help control the stray animal population in the city and reduce human vs animal conflicts.

Vaccinations are key to the health and safety of animals, and, consequently, to humans. We carried out 6210 vaccinations in the financial year of 2022-2023. This included anti-rabies vaccination (ARV) and multi-component vaccination (MCV). The MCV inoculates against a number of viral and bacterial strains. HAS participated in three such drives this year.

We conducted a week-long ARV drive from 25 September 2022 to

02 October 2022, on the occasion of the 16th World Rabies Day, 28 September 2022. This was hosted at our ABC and Rescue Centre, and in locations in North and West Coimbatore. The local communities helped us vaccinate 6210 pets and community dogs.

We provided veterinary support to a mass vaccination drive in rabies hot spots in Coimbatore organised by Dogs of Coimbatore and Worldwide Veterinary Service in December 2022. 504 dogs were successfully vaccinated through this drive. A smaller drive was organised at the Amrita Institute, Ettimadai in November 2022. Our team, led by Dr. Navaneetha Krishnan, successfully administered ARV to 16 dogs and nine cats. The vaccination drive was supplemented by an awareness program at the campus.

Anti-rabies vaccination drive at Amrita University

Community engagements

HAS organised a variety of events to create more awareness about animal welfare among the larger community. Our team engaged with educational institutions and corporate partners to build awareness about, and sensitivity towards, stray animals.

We celebrated our 16th anniversary with the launch of the Humane Animal Hospital (HAH) at Selvapuram, Coimbatore in April 2022. A significant milestone in our journey, the hospital aims to

provide affordable and quality health care for strays and pets in Coimbatore. The facility was inaugurated by veteran rescuer, Dawn William of Blue Cross India (Chennai), who spoke at length about the importance of volunteering, law enforcement, and prevention of cruelty towards animals.

Our student engagements comprised visits to our centre by students of four institutions from Coimbatore: GD School, VCV

Bosch volunteers at work

School, GRD College, and Karunya Institute of Technology and Sciences. Besides taking a guided tour of our facilities, students participated enthusiastically in some of our care activities. As part of our outreach program, Dr. Mini Vasudevan addressed the students of Kongunadu College and SNS Institutions in separate events about the five freedoms of animal welfare, challenges faced by animals on the city streets, and adopting pets rather than shopping for them. The student visits and interactions were marked by the students' curiosity and eagerness to learn.

Our engagement with corporate partners from Bosch, Ford Motors, and HCL Harit, resulted in several productive and satisfying visits and drives. We conducted sensitisation workshops for corporate employees and teams. Employees participated in the programs with great joy and ful-

filment. They received hands-on training in grooming dogs, in taking them for walks, and in assisting physically challenged dogs. These workshops resulted in an Animal Sensitisation Certificate Programme for Bosch employees. The company hopes to certify 100 employees by September 2023.

Our partner, HCL Harit, has supported us generously by funding the ARV and ABC program, by providing funds for improving the physical infrastructure at our ABC and Rescue Centre and the Sanctuary, and funding for rescue operations. This has enabled us to serve umpteen street animals in different ways.

Ford Motors has similarly supported us by funding various animal welfare activities and drives. We thank our corporate partners for their continued support in helping us help street animals and raising awareness about animal welfare.

Volunteers with rescue pets

Awards and recognitions

Dr. Mini Vasudevan acknowledged on multiple platforms

On the International Women's Day 2023, our founder, Dr. Mini Vasudevan, was lauded at three distinct events organised by BNI Nayara, PSG Institute of Technology, and Kathir Engineering College. This triple recognition not only honours Dr. Mini's exceptional contributions to animal welfare, but also symbolises the broader scope for women to excel in this field. She set a powerful example, inspiring future generations of women in these educational institutions to join and thrive in the noble endeavor of animal welfare.

Feature in Harit Khabr

In a noteworthy collaboration, Aishwarya Ramasamy from HAS and Swarnalatha J, founder of

Swarga Foundation, took center stage at the 4th Indian Congress for Persons with Disabilities on 9 February 2023. Together, they spearheaded an enlightening seminar and group discussion on the myriad benefits of Animal-assisted therapy (AAT), emphasising its potential to enhance the well-being and healing of individuals with disabilities. This engaging session not only sparked profound shifts in perspectives and garnered numerous adoption inquiries, but also earned well-deserved recognition. Harit Khabr, a monthly publication by World Comics India in collaboration with HCL Foundation, acknowledged and celebrated the impactful strides made in the realm of AAT during this insightful event.

Testimonials

Kitsune's adopter Aditi

"After the heartache of losing a pet, when I summoned the courage to adopt a pet again, I knew it had to be an Indie. The prospect of finding a loving home to a soul that had weathered life's storms warmed my heart. So, one rainy day, I visited the HAS shelter, scanning a bunch of lively dogs, when my eyes met Kitsune's, a quiet and observant pup who had been watching me since I stepped in. At the first instance, Kitsune hesitated to open up, and found it difficult to trust a new person. However, after spending some time together and earning her confidence, the adoption process was seamlessly facilitated. Now, Kitsune fills our home with immeasurable joy, a testament to the happiness that comes from adopting a pet from a shelter."

Ivy's adopter, Subhapiya

"I wish to express my heartfelt gratitude to HAS for bringing Ivy into our family. Special thanks go to Sree Resmi, a dedicated HAS volunteer, who played a crucial role in connecting us for the adoption. As briefed by HAS initially, Ivy was a quiet pup. However, over time, she transformed

into my daughter's best friend. Ivy listens to our conversations as if she understands every word, eagerly awaits her 10 pm walks every night, and acts as a vigilant protector of our home and family. She provides us with unconditional love, emotional support, and is an excellent stress-buster. Once again, thank you, HAS, for Ivy."

Aditi and Kitsune

Subhapriya and Ivy

Volunteer testimony by Dr. Ellie Bayne

“HAS is a hot, dusty battleground at the front line of veterinary public health, a stark contrast to the cool, sterilised environment of first-world veterinary medicine that I called home in the UK. In the UK, street dogs are unheard of. Most dogs are neutered, vaccinated, and free from various ailments. The street dogs of Coimbatore lack these protections, complicating even the simplest medical cases. The daily challenges encompass an alphabet of conditions: abuse, burns, brain trauma, caesarians, deadly dystocias, eyes popped out, femurs snapped, gargantuan tumors, and horrific hernias. If someone turned up with a flying pig, it wouldn't have surprised me!

“When I volunteered at HAS,

what impressed me most was the calm, clinical ease with which the team negotiated the chaos. Gold standard care is the best treatment provided in-situ, and the staff of HAS staff are 24-carat. Such determination is rare and special. On World Rabies Day, we raced through the sweltering back streets of Coimbatore armed not with guns but with needles, syringes, vaccines, and dog nets. Vaccinating over 120 street dogs, and engaging with nearly 200 citizens in one day is just one example of their tireless efforts.

“What HAS achieves on such a limited budget is heroic. They protect four million citizens of Coimbatore against zoonotic diseases, and thousands of street dogs from needless suffering. However, heroism alone is not enough. With the World Health Organization calling

for greater veterinary funding to prevent the next global pandemic, the daily reality of choosing between bandages and blood tubes for any medical professional should not exist.

“HAS is primarily funded through donations from good samaritans, as financial support from wealthier organisations is not guaranteed. I firmly believe that with extra funding, HAS can neuter every street dog in Coimbatore and vaccinate each one against rabies. Imagine the achievement of eliminating the deadliest disease on Earth from one of Tamil Nadu's largest cities. Let's make this happen!”

Treatment testimony by Ambika

“When I first received a call about Herriot, he had been discovered in a dire state, with severe maggot infestations on his neck and back. The rural community, ignorant of his condition, had resorted to pouring kerosene on the infected areas, causing him unbearable pain. When I rescued him and brought him to HAS, he was administered treatment over an extended period, during which the maggots were carefully cleared and his wounds were treated. HAS also went beyond treating his physical injuries; they also undertook his sterilisation, and ensured his smooth transition back into the community. Today, Herriot stands as a living example of the transformative power of love and care.”

Dr. Ellie Bayne

Herriot

What's in store for 2023-2024?

Harnessing the impact of GARC's Animal Welfare Champion Award

We have received the prestigious Animal Welfare Champion Award from GARC on World Rabies Day 2023. This accolade not only recognises our significant contribution to rabies prevention in Coimbatore, but is also accompanied by a grant of 1500 USD and a suite of online tools to manage our work. With a strategic focus on maximising these funds, we are dedicated to doubling down on our efforts towards achieving a rabies-free Coimbatore.

ABC program expansion

Our aspirations for the coming year include a substantial expansion of our Animal Birth Control

(ABC) program. With the allocation of additional land adjacent to our existing Seeranaickenpalayam shelter, graciously provided on lease by SPCA, we plan to amplify our impact by expanding our ABC initiatives by at least 50%.

Operationalising the Sanctuary Hospital

Thanks to the generous donations from our corporate partners, the construction of the Sanctuary Hospital has been successfully completed. Looking forward, our focus is on equipping and operationalising the facility to function as a full-fledged unit. This move aims to extend our reach even to the outskirts of our city, ensuring comprehensive care for animals in need.

Financials

Balance sheet (in INR)	2022-2023	2021-2022

NOTES

Note 1: The filing for the financial year of 2022-2023, and previous years, can be studied in greater detail on www.hasindia.org/about.html. All annual reports and other documents are also on the website.

Note 2: The entry *infrastructure improvements and equipments* includes partial sponsorships.

Note 3: The main sources of income are: 1) Partial reimburse-

ment by the local municipality for spaying/neutering of stray dogs. 2) Donations from corporations, individuals, trustees, and board members cover approximately 70% of the total expenditure. 3) Loans from trustees and board members cover the shortfall, which is approximately 15% of the total expenditure.

Note 4: If you have any questions, please don't hesitate to contact us at admin@hasindia.org.

How you can make a difference

You can support HAS in a number of ways. Please note, in terms of monetary support, no amount is too small.

Donate

Community support in the form of donations, individual and organisational, enables us to save many animal lives, and care for them on a daily basis.

You may choose to contribute with a general purpose donation, directly towards animal care (see table 2 for more details on how such donations are utilised), or to help us secure critical assets for animal care (see table 3 for more the prices of such assets).

Sponsor through virtual adoption

The average monthly cost for a dog in the care of HAS is INR 4000. Cats are INR 2000. If you decide to adopt one of our residents, they will be over the moon! Please visit them at www.hasindia.org/animals.html.

Volunteering

We are always on the lookout for new volunteers! Here are all the ways you can help us help our furry friends:

- Volunteer for enabling adoptions;
- Volunteer for other activities at the shelter;
- Write or design for us!
- Help with our Humane Education Programme.

Table 3. Prices of asset donations 2022-2023

Purpose	Amount in INR	Amount in USD
Kennel (for the Sanctuary)	25,000	320
Urine analyser machine	50,000	650
Serology machine	2,00,000	2,500
Laboratory (for the Sanctuary)	3,50,000	4,000

tion Programme.

In addition, we welcome volunteer veterinarians, vet nurses or vet students. More information is available at www.hasindia.org/volunteer.html.

Foster and adopt

If you are able to adopt one of our Sanctuary residents, you will certainly make an unimaginable

difference to them. Even though the Sanctuary is great for humans and animals alike, we are sure most of our cats and dogs would thrive within their very own family.

In general

Ensure the animals you are responsible for are sterilised and vaccinated. And, whenever possible, please do spread awareness.

Table 2. Utilisation of general donations 2022-2023

Purpose	Amount in INR	Amount in USD
Per cat per month	2,000	25
Per dog per month	4,000	50
Per cow/pony per month	6,000	75
One day of food for all animals in our care	8,000	100
One day of medicine	10,000	125
10 ABCs and rabies vaccinations	16,000	200
All vaccinations for one month	20,000	250

Donation and sponsor methods

If you are interested in making a donation or sponsor an animal, please visit www.hasindia.org/donate.html for more information.

For quick donations, please use the Gpay and Amazon QR codes. All donations are tax-exempt under section 80G of the IT Act.

Acknowledgements

It takes a community to care for animals. Several individuals and organisations have contributed their efforts and support in myriad ways to make this happen. We begin by thanking our trustees for their commitment and financial support; our dedicated team at the ABC and Rescue Centre and at the Sanctuary who go beyond the call of duty to enable us to serve the animals to the best of our abilities; and the volunteers who bring fresh energy, enthusiasm and love to animal care and related work.

A special thanks to the com-

panies who are promoting our annual calendar, EveryLife, whose support add funds and visibility to our lifesaving work.

We are very thankful to our pool of donors, both individuals and organisations. Our efforts wouldn't have been possible without their generous support.

And, finally, we are extremely grateful for the many loving families of adoptive and foster parents who have added great value to our care and support; our heartfelt thanks to every one of them.

Humane Animal Society (HAS) was started in 2006 to address animal welfare in the city of Coimbatore, and to carry out the critical function of Animal Birth Control (ABC). HAS is a public non-profit organisation registered with Government of Tamil Nadu as a trust under certificate no. 998/2006 under section 12A (a) of the IT act 1961. The mission statement of HAS is to mitigate animal suffering through humane ABC, rescue, treatment and rehabilitation. To spread awareness about animal rights through education in schools. To empower humans by providing them with a platform to contribute to the cause in their own unique way. Our vision is of a compassionate society where exploitation and abuse of animals is a thing of the past, and a future where all animals can claim their place on this Earth
